

Jennifer Malavasi is a fish and wildlife biologist and compliance specialist with 17 years of federal, state, and private experience. She is a graduate of Rutgers University (2006), University of Alaska – Fairbanks (2007), and Montana State University (2018). Prior to working for SWCA Environmental, based in Wyoming, she worked for US Fish and Wildlife Service, Army Corps of Engineers, Wyoming Game and Fish Department, National Oceanic and Atmospheric Administration, and the National Park Service. On a detail at Acadia National Park, working on documenting sediment accumulation, deposits, and run-off from the historic carriage roads into surrounding marshes and forests, Jennifer became aware of the problems associated with improper sediment and erosion control, and began down the path of learning more and implementing control strategies in various restoration projects across the country. Now, as a project manager, she works to educate clients on compliance and help provide solutions on their projects. Jennifer first joined IECA in 2018.
