

OLIVIA CRAMM

ENVIRONMENTAL COMPLIANCE

SUMMARY OF EXPERIENCE

Olivia has been instrumental in the creation and implementation of environmental compliance standards and policies for Big-D Construction, an organization headquartered in Utah which has quadrupled in annual national volume over the last ten years. Her area of expertise is in stormwater management and NPDES regulations.

With an in depth familiarity of EPA regulations and an emphasis on Utah Department of Environmental Quality Regulations, she is intimately familiar with all aspects of the Utah State and local storm water regulations, as well as numerous regulations in other states. This expertise enables Olivia to support environmental efforts in Utah and throughout the US.

Big-D's Environmental and Stormwater Program is highly respected in Utah by State and Local Regulatory Officials due to Olivia's acute knowledge of regulations and their implementation on projects throughout the state.

Collectively, Big-D Companies maintain eight regional offices ranging from California to Minneapolis with a reach of construction projects extending throughout the US from coast to coast. Olivia works with Big-D's key construction project team members starting on day one to create, communicate and ultimately adhere to a project specific environmental compliance plan. Her daily interaction with site teams, trade partners, and regulatory inspection agencies among others, ensures environmental compliance is front of mind to ensure the project meets and continues to adhere to all regulations.

Her development and implementation of the SWPPP Field Training Program has been extremely successful in educating both company personnel as well as trade partners on best practices, new products, and ways to improve all aspects of environmental compliance.

CERTIFICATIONS / TRAINING

- LEED Green Associate #10914165
- Certified Professional of Sediment and Erosion Control (CPESC) #5549
- Certified Inspector of Sediment & Erosion Control (CISEC) #372
- California Qualified Storm Water Developer (QSD) #20641
- California Qualified Storm Water Professional (QSP) #20641
- Washington/Oregon Certified Erosion & Sediment Control Lead (CESCL) #81441
- University of Minnesota Design of Construction SWPPP Certification
- Nevada Dept. of Transportation Water Pollution Control Manager
- Colorado CETC 150 - Stormwater Management & Erosion Control
- Utah Dept. of Transportation Environmental Control Supervisor
- Utah Registered Stormwater Inspector and Trainor
- RCRA Hazardous Waste Training
- 40 HR Hazwopper
