## 2<sup>nd</sup> Annual **GREEN** and **BLUE** Seminar

Join the top professionals in the industry for presentations on soil health, soil stabilization, and new technologies for geotextiles, geogrids, and underground detention systems. Learn how soil health leads to successful vegetation for reclamation projects in mining, oil and gas, transportation, and construction. **Value Engineered Solutions** for drainage, water conveyance and soil stabilization will be discussed. This is a great opportunity to meet with professionals and fellow colleagues to discuss the opportunities and challenges facing our industry in 2023.
